Secure Firearm Products' High-Security Firearm Cases Available at Brownells

CARL JUNCTION, MISSOURI - Secure Firearm Products (SFP) announced today that their High-Security Handgun and Tactical/Rifle Cases are now available through Brownells, the World's Largest Supplier of Firearms Accessories and Gunsmithing Tools. Four different models of SFP's high security aluminum firearm cases are available in the Brownell's catalog as well as on their website at www.brownells.com.

SFP High-Security Handgun Case

Secure Firearm Products makes traveling with your firearms safe and easy with their new High-Security Handgun Cases. The SFP handgun cases are constructed of welded aluminum, which means they cannot be shredded or shattered like standard plastic cases can, and are streamlined to fit right inside your checked luggage. Not only does this help prevent theft, travelers also will avoid additional baggage fees. Best of all, the cases incorporate a side locking cable system for added security. The cable is attached to the handgun case at two points. Simply loop the cable around the struts, or hardpoints on the interior of your suitcase, slide your handgun in, and lock the case using SFP's exclusive push button locking system. The lock not only secures the cable, it locks down the lid of the case via an internal locking system. Then pocket the keys. There's no exposed padlock that can be cut off or used as leverage to rip off the latches. When you need to present your firearm for inspection, simply open your suitcase, open the handgun case with the key, present your firearm and then close the case with the push button lock and pocket the keys. Traveling with firearms has never been so easy and so secure.

SFP Tactical and Rifle Case

This heavy duty case was designed for military, law enforcement and Homeland Security personnel, hunters and target shooters who want a case they can secure to a vehicle yet easily remove it when needed. Multiple docking stations are available enabling cases to be mounted vertically or horizontally in the trunk of your car or in the back of your truck or SUV. The tactical cases include a separate internal locking system that allows the case to be securely locked to the docking station. Options available include keying locks alike and/or a removable core lock for key control systems. This case is made of heavy gauge aluminum, and all corners are welded for strength. Medium density foam inside keeps your firearm from moving during travel. A high-density urethane gasket seal keeps out dust and moisture and the 16 gauge steel piano hinge increases lid integrity. A single key is used to enter the case and the exclusive push-button internal locking system prevents cutting and picking of the lock.
